+ SERVICES

Architectural Panel Systems offers a range of custom patina finishes, as part of our Prestige range of metals. Metals such as Brass, Copper, Bronze, Stainless Steel, Aluminium and Mild Steel are able to be chemically treated, patinated and sealed as part of our colouring process to achieve a high end, unique, custom finish unmatched by any other form of topical treatment. Precious metal coating is a liquid application process that involves high end surface technology. We deliver a range of one of a kind metal finish solutions, dealing closely with Architects, Designers, Builders, Developers, Corporate Business and direct to public. Our range of finishes can be used for both modern and traditional requirements. The patina process can be customised to form different patterns and create an instant aged or antique finish.

Metal patination is unique and services a niche, specialty market. To complement our range of patination finishes, we also offer a complete manufacturing service, in house at our production facility in Geelong. Our product and services extend nationally, with both supply only and supply & installation options available.

The Architectural Panel Systems office team can also assist in the design and engineering of all products where required, whether it be for architectural, heritage, sculptural, simple shelving for a shop fit out or lift doors in a grand hotel.

Architectural Panel Systems regularly service the following professions, industry and sectors.

- + Architects
- + Designers
- + Interior Designers
- + Builders
- + Developers
- + Landscapers
- + Government
- + Retail
- + Corporate

- + Shopfitting
- + Direct To Public

We service a wide field of industries and commonly manufacture a range of products which include:

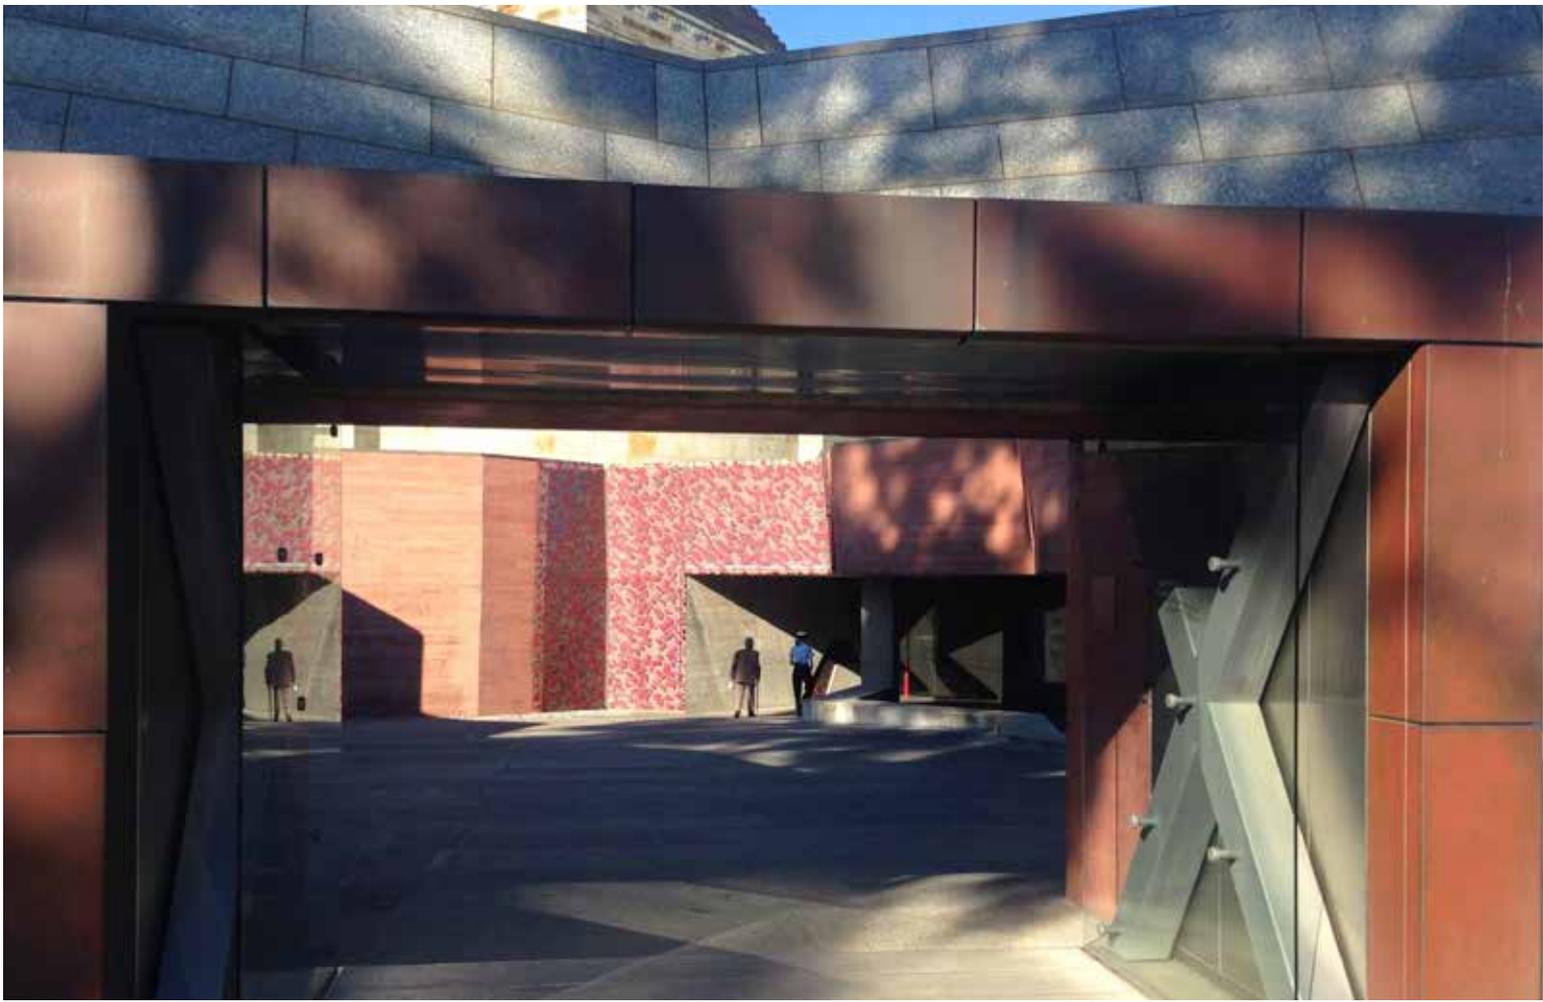

- + Metal Facades & Cladding
- + Shelving
- + Columns
- + Signage
- + Sculptures
- + Screens
- + Custom Furniture
- + Streetscapes
- + Lighting
- + Doors
- + Countertops
- + Kitchens
- + Balustrading

+ COLOUR SELECTION

All images shown are to be used as a reference only and have been given a fade to show the truest representation possible. For a clear indication of the finishes, please request samples from our office staff. Architectural Panel Systems can also customise our colour range and attempt specific colour matches where required. For further information on this, please contact our office team directly.
