

COPPER IMPRESSIONS RANGE

For Prestige Applications

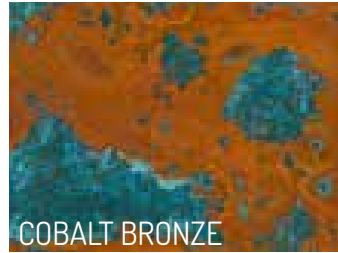

COPPER IMPRESSIONS RANGE

ANTIQUATED

Antiquated Copper is a fresh take on a classic look. This carefully crafted design creates an authentic, rustic charm that resembles the seasoned appearance of an age old antique coin. Antiquated Copper is perfect for those wanting to add traditional beauty to any project.

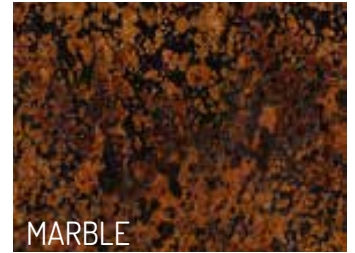

COBALT BRONZE

Rich indigo blues and striking turquoise dominate over shades of brown and copper. Cobalt Bronze is popularly suited to coastal and nautical regions.

BURNT PENNY

This alluring design has traditional penny-coloured copper areas with repeated random burn marks, resembling that of a burnt copper penny.

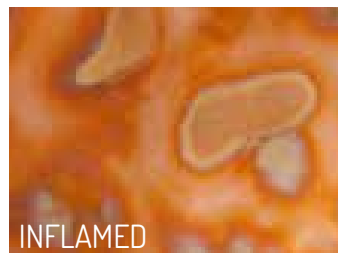

MARBLE

A primarily black finish with rich browns and golden coppery areas coming through create a truly beautiful and luxurious finish.

MAGMA

Magma is a stunning finish that takes multiple shades of imposing blacks and resplendent coppery areas and streaks them in a way that resembles a subdued stream of flowing lava.

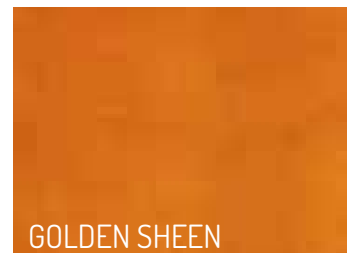

INFLAMED

Inflamed Copper is a combination of fire and a sheet of paper as it is being burned. Hollow black splotches surrounded by fiery yellows are matched with an enthralling orange backdrop.

GOLDEN BLAZE

Golden Blaze is an enhanced, brighter variation of our traditional Golden Sheen. A lush and radiant glow transforms the copper from its traditional appearance to a dazzling golden tint.

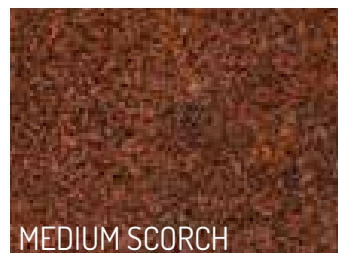

GOLDEN SHEEN

This refulgent Copper has been glazed with a golden sheen. It is primarily a solid colour carried by subtle marks which have been spread throughout.

LIGHT SCORCH

A steady, consistent pattern of light scorch marks scattered throughout a bronze tinted background.

MEDIUM SCORCH

A steady, consistent pattern of medium scorch marks scattered throughout a bronze tinted background.

DARK SCORCH

A steady, consistent pattern of dark scorch marks scattered throughout a bronze tinted background.

PIGMENTED

Stunning shades of terracotta red, intense orange and black mixed with yellow copper toned areas, creating exotic streaks and patches.

The Impressions Copper Range can be specified on any of the range of systems available by Architectural Panel Systems Australia.

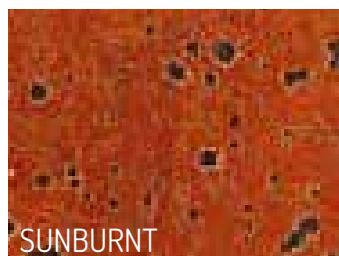

The Copper Impressions Range of patterns shown here have been reproduced to represent actual product colours as accurately as possible within the limitations of the four colour printing process. Prior to purchase we recommend checking all final colour selections against that of an actual Architectural Panel Systems Australia product sample for colour accuracy.

Beautiful shades of terracotta red, opulent orange and sea blue, bright copper colours, mixed with hints of black create a truly unique finish.

Smooth shades of red, orange, brown, yellow-gold and a rich black give the sensation of comets moving throughout the galaxy.

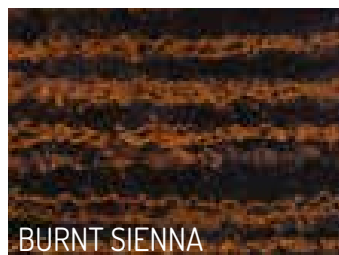

Hints of purplish-red and yellow-gold swirl throughout the radiant orange background with bursts of black droplets giving Sunburnt its warmth and beauty.

Several shades of green amongst islands of copper give Veridian its vibrant stand out style patina.

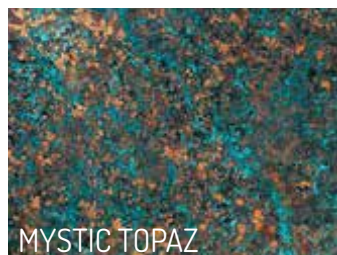

A perfect snapshot resembling its name-sake has been captured and fused into the copper itself. Numerous robust drops of dark and light burgundy scattered throughout the Copper, atop one another make this one of the most concentrated patina patterns.

Vertical or horizontal stripes of rich browns and deep copper, amongst a black background create our Burnt Sienna patina.

Wild Fire will set your room ablaze with splashes of orange, rust tones and flecks of black arrayed in a unique style.

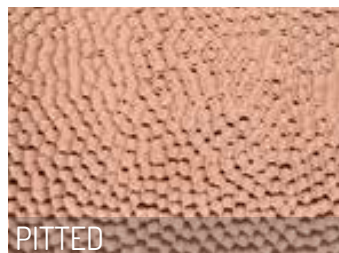

Mystic Topaz is a unique blend of natural and embellished copper tones, enriched with deep shades of blue.

Textured Copper is an ideal option to add a touch of class and elegance to any project. Suited for use on exterior and interior applications, you can be assured of a luxurious, stunning finish, when choosing Textured Copper.

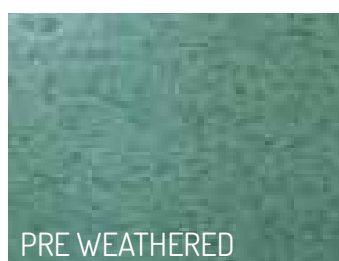

A smooth silk like appearance best describes our Golden Silk textured Copper. Golden Silk delivers a very pleasing finish, complimented by its smooth and elegant texture.

Multiple indentations create our Pitted Copper finish which provides unique shadow effects when caught in natural and artificial light from various angles.

Leather Copper provides a textured, weathered finish that best resembles aged old worn leather.

Our Pre-Weathered Copper has been put through a controlled process to speed up the natural aging of the material to create a mottled and lively pattern which is usually achieved after years of natural aging.

Standard Copper has a bright orange, red surface which gradually turns to shades of brown and green when exposed to natural environments.

COPPER IMPRESSIONS RANGE

Copper Impressions Range

Our Copper Impressions Range is half hard; meaning that it is pure, soft and designed specifically for high quality roof and wall cladding.

Using a specialised, creative, hand crafted patina process, our workmanship involves a careful selection of chemicals and topical treatments to create colours and patina patterns on each individual piece of copper in order to achieve a striking, yet harmonious visual effect.

The secret to our unique Copper Impressions Range products exceptional finish has been developed through over a decade of experimentation and testing.

Our hand crafted colouring method involves a natural patina process and no uses of paints or dyes, which results in the material bringing out its natural visually appealing colours.

Variety Of Finishes

Copper Impressions Range is available in a wide range of finishes and patinas, with 23 different colours and textures currently available.

Due to the variety of controlled hand crafted processes the Copper sheet undergoes, each sheet has its own distinctive patina and colour, rendering the possibilities as endless.

Slight variations in colour, pattern and patina should be expected on each sheet of Copper Impressions Range as they are individually treated for each project.

Contact Architectural Panel Systems Australia for further information regarding colour selection and samples

Applications

Copper Impressions are used on a wide range of applications, all of which need to be treated differently to ensure the highest quality finish.

Architectural Panel Systems Australia offer a range of coatings which include a commercial grade epoxy, a copper lacquer, a copper lacquer with a satin gloss and a copper wax to protect the natural patina of the product.

Our range of Copper Impressions finishes are commonly used in the following applications
