

FINISHES + TEXTURES

With a wide array of embossed patterns and stainless steel finishes, you're sure to find the perfect combination for your project.

Most of our products are available with various embossed patterns. The embossing can be used to enhance your design, whether you want to diffuse light, introduce depth to your façade or reduce finger-printing. Our stainless steel products are available in several finishes. Our standard options are Mill Finish (2B) or Bright Annealed (2BA).

FINISHES + TEXTURES
